

## WT 20 - Thorium 2%

### Caratteristiche

| Dettagli tecnici        |   |
|-------------------------|---|
| Type                    | Thorium 2%                              |
| Application             | Steel and stainless steel               |
| Diameter                | 1.6 mm                                  |
| Length Of Electrode     | 175 mm                                  |
| Current (mini - Maxi)   | 50-120 A                                |
| Colour                  | Red                                     |
| Arc Stability           | Average                                 |
| Stricking               | Excellent                               |
| Lasting                 | Good                                    |
| Thermal Resistance      | Good                                    |
| Altri dati              |   |
| Tipo di imballo         | Electrode Pack                          |
| Standard                | ISO 6848:EN 26848                       |
