# CERASKIN

Welding  
Anti-spatters  
spray  
with  
ceramic  
coating

**Boost productivity  
& reduce costs !**

**CERASKIN** is a rapid drying ceramic coating spray providing exceptional protection of welding equipment and welded parts from damage caused by spatters

#### Product features:

- An exceptionally fast drying, long lasting and durable ceramic coating formulated to withstand the most demanding requirements in the professional welding environment.
- The ceramic base makes a barrier and prevents weld spatter adhering to welding equipment and welded parts.
- CERASKIN grants 8 consecutive hours welding work (1 working day), without any further adds of product.

#### User's benefits:

- Universal product for every MIG/MAG welding manual, automatic and robotic applications.
- Improve the productivity and earn time. The welding spatters do not stick on nozzles and avoid any interruption of your manufacturing process.
- Perfect welding due to better shielding gas flow with clean welding torch nozzles.
- Earn money. Thanks to CERASKIN, your nozzles will last longer (until 5 times more).
- CERASKIN protects from sticking welding spatters. Intensive clean up is no more necessary. You can remove the welding spatters with a soft brush.

#### Hints for use:

- Shake the spray can for 20-30 seconds before use. To ensure an even coating, spray approx 15 to 20 cm from the surface requiring protection. The coating dries and is ready for use in a few seconds.

#### To order:

Cat. nr	<b>W000277679 - per 12</b>
Aerosol	400 ml net volume 520 ml nominal volume
